# EMMANUEL **OYELAKIN**

## Full-stack Developer

# PROFESSIONAL SUMMARY

Fullstack developer with 3+ years of experience in building and maintaining responsive web applications. Proficient in React, Nextjs, Node.js, and MongoDB, with a strong background in DevOps practices. Proven ability to deliver high-quality, scalable solutions.

I am adept at collaborating with cross-functional teams, utilizing Agile methodologies to deliver projects on time and within scope.

## EDUCATION

#### University of Lagos, Nigeria

Bachelor's Degree in Petroleum and Gas Engineering (expected date of graduation: 12/24) 2018 - 2024

#### Stutern Graduate Accelerator Program

Diploma in Backend Development 11/2022 - 07/2023

# TECHNICAL SKILLS

#### Front-end Development

- React.js
- HTML5 & CSS3
- JavaScript (ES6+) & Typescript
- Nextjs

#### Back-end Development

- Node.js
- Express.js
- MongoDB
- Appwrite

#### Full-stack Integration

- API Development
- Microservices Architecture

#### DevOps

- Docker
- AWS

#### Version Control

- Git
- GitHub

#### Project Management

TrelloSlack

# PROFESSIONAL EXPERIENCE

#### **Backend Developer**

BlueDevTech Solutions | 2021 - 2023

- Successfully integrated third-party APIs to enhance product functionality, expanding the range of services offered to customers.
- Oversaw and led cross-functional teams to successfully complete several projects on schedule and within budget, increasing overall project efficiency.
- Identified and carried out strategic initiatives in close collaboration with senior management, resulting in a rise in overall business revenue through innovative tech solutions.
- Mentored and trained junior developers, fostering a collaborative learning environment and enhancing team skills and capabilities.
- Actively participated in code reviews, ensuring code quality and adherence to best practices, which led to a more robust and maintainable codebase.

#### **Engineering Intern**

Mobil 11Plc(Lube Oil Blending Plant) | 09/2020 - 07/2021

- I contributed to maintaining high product quality standards by implementing rigorous quality control measures in the blending process.
- Collaborated and worked closely with my supervisors and other interns to improve overall blending operations.
- Assisted in implementing preventive maintenance strategies for blending equipment, reducing downtime and improving overall equipment reliability.
- Ensured I adhered strictly to environmental and safety regulations, contributing to a safer working environment and maintaining compliance with industry standards.

# CERTIFICATIONS

**The Complete JavaScript Course: Build Real Projects** | <u>Link</u> Udemy

**Certification of Completion: Backend Development** | <u>Link</u> Stutern Academy

**Certificate of Completion: Safety In The Utility Industry** | <u>Link</u> Coursera

<u>Certification: Canva Design Certificate</u> (<u>Completed 100 designs) | Link</u> Canva Team

## SELECTED PROJECTS

#### Dejj Foodie App | Link

Simplified the food ordering experience for customers by developing a dynamic and responsive user-friendly online store featuring product listings, user authentication, and a shopping cart while integrating RESTful APIs I developed and payment methods(Stripe). **Technologies Used:** React.js, MongoDB,

Google Firebase, Express.js, Node.js, Tailwindcss, Daisy UI, JavaScript(ES6+), GitHub, Stripe(software), Vercel. **Github Link:** <u>Link</u>

#### Dejj Video Chat Application | Link

Developed an application where I implemented real-time video and audio communication, enabling seamless interactions between users. I integrated Zegocloud's video-chat functionality into the application

Technologies Used: React.js, JavaScript, Tailwindcss, Zegocloud, Vercel Github Link: <u>Link</u>

# PROJECTS (CONTINUED)

#### Dejj Healthcare App | Link

Developed a user-friendly application that simplifies the hospital appointment booking process, reducing wait times and frustrations for patients. I also integrated Sentry into the application to monitor the application's performance which enables me to debug more efficiently.

I also utilized Appwrite as the backend infrastructure for my application, leveraging its user authentication, database management, and file storage capabilities.

**Technologies Used:** Next.js, Typescript, Shadon UI, Aceternity, Sentry, Appwrite, Vercel.
